

Letter From the Editor

Dear friends, colleagues!

Here is the current REJR issue of 2017 year.

You can find articles on different radiology topics in this issue.

We have kept our promise – in 2017 we published more than 75 scientific works, 3 lectures and 4 master-classes.

All the journal materials are of a high quality. Editorial board performed double-blind reviews. And this year only two scientific works were rejected by the reviewers.

New 2018 Year is approaching!

I congratulate all members of the editorial board, all the journal employees and our readers with a Happy New Year!

I wish everyone good health, successes in life and creative activity!

Chief Editor

Academician of Russian Academy of Science, S.K. Ternovoy.
