

## Letter From the Chief Editor

Dear colleagues!

We are pleased to meet you once again on the electronic pages of the third issue of REJR in 2024. We thank you for your active collaboration with the journal, for your articles, and for your suggestions, which help the editorial team improve our work and enable us to publish more interesting and useful content.

For many of our authors, the question of the journal's compliance with modern standards remains relevant, especially concerning scientific publications that are required for the completion of dissertation research by candidates and doctors of science. The Russian Electronic Journal of Radiological Diagnostics continues to accept articles in the scientific specialty 3.1.25 – Radiological Diagnostics. The journal is included in the list of the Higher Attestation Commission (HAC) of the Ministry of Science and Higher Education of the Russian Federation (Category K1), as well as in RSCI and the core of the Russian Science Citation Index (RSCI), and is indexed in the international Scopus database. Additionally, REJR is part of the "White List" approved by the Interdepartmental Working Group on the Formation and Update of Scientific Journals under the Ministry of Education and Science of Russia.

In this issue of REJR, we are publishing 12 original articles and two clinical case reports submitted by specialists in various modalities of radiological diagnostics. We are pleased to note that our collaboration with international colleagues continues: in this issue, doctors from Iraq and India have presented the results of their research. We look forward to further cooperation with all our authors—both leading scientists and early-career researchers.

Enjoy your reading! See you soon!

Chief Editor

A handwritten signature in black ink, which appears to read "Н. Серова" (N. Serova).
